EXECUTIVE SUMMARY

Ninyo & Moore has conducted a Phase I Environmental Site Assessment (ESA) on approximately 16.7 acres of land located northeast of North 87th Street and Clover Basin Drive in Longmont, Boulder County, Colorado (site). The site is addressed as 8902, 8840, and 8800 Quail Road and designated as Boulder County Assessor's Parcel Numbers 131517200031 (8902 Quail Road), 131517200030 (8902 Quail Road), 131517200004 (8840 Quail Road), and 131517200022 (8800 Quail Road).

The objective of this ESA is to identify, to the extent feasible pursuant to the process described in ASTM E1527, recognized environmental conditions (RECs), which are defined by ASTM as *"the presence or likely presence of any hazardous substances or petroleum products in, on, or at the property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions."* Ninyo & Moore performed this ESA in conformance with the scope and limitations of ASTM E1527-21.

In general, the following items were noted:

- Review of historical resources indicated the site was developed with a residence on the northwest corner from at least 1900. The remainder of the site was agricultural crop land from at least 1937 through 1968 when two more residences and associated barns and sheds were constructed on the north portion of the site (the southern portion of the site appeared to continue to be agricultural crop land).

The site vicinity appeared to be agricultural crop land with a roadway to the north from at least 1937 through the early 1970s when residential homes were shown to the north and barns were shown to the west. By the early 1980s, a roadway was shown to the south and a residential home was shown to the east. By the late 1980s, more barns were shown to the west. By 1999, a residential development was shown to the south of the site and several residential homes were shown to the east. No significant changes were noted from the late 1990s through present.

Concerning the agricultural history of the site, irrigated cultivated surficial soils can become contaminated with hazardous substances as a result of the application of agricultural chemicals. Certain organochlorine pesticides are persistent in the environment and residual pesticide concentrations in surface soils are consequently a possible contaminant on irrigated agricultural sites. We encountered no evidence during review of historic information suggesting that the site contained an agricultural chemical mixing or staging area, or manufacturing or warehousing facility, where pesticide residuals in soils could accumulate at concentrations greater than those that can occur as a result of normal cultivated field applications. Based on these circumstances, the health risk associated with former applications of agricultural chemicals to the property is likely low.

- On November 7, 2023, Ms. Cara Jacobs, Project Environmental Scientist with Ninyo & Moore, conducted a site reconnaissance. Ms. Jacobs conducted the site reconnaissance

unaccompanied. The reconnaissance involved visual observation of the site and adjoining properties.

- At the time of the site reconnaissance, 8800 Quail Road was developed with a single-family residence reportedly constructed in 1900, a farm utility building reportedly constructed in 1900, and a barn reportedly constructed in 2004; 8840 Quail Road was developed with a single-family residence reportedly constructed in 1968 and a barn reportedly constructed in 1968; and 8902 Quail Road was developed with a single-family residence reportedly constructed in 1968 and an open cattle shed reportedly constructed in 1968.
- The northern adjoining property is developed with Quail Road followed by residences (8747-8847 Quail Road, 9421 Schlagel Street, 9423 North 89th Street, and 1043-1051 Willow Creek Circle). The eastern adjoining property is developed with a residential home (3125 Depo Drive) and Wildfire Court, followed by a residential home (1220 Wildfire Court). The southern adjoining property is developed with Clover Basin Drive, followed by residences (3605-3617 Sunflower Circle, 1401-1429 Clover Creek Drive, and 3341-3353 Larkspur Drive). The western adjoining property is developed with a residence and barns (9308 North 87th Street). Based on observations made during the site reconnaissance and review of agency file information, the adjoining properties were not identified as a REC.
- During the site reconnaissance, no hazardous substances or petroleum products were observed on or adjoining to the site.

Three pole-mounted transformers were observed at the site: one on the northwest portion, one on the north boundary, and one on the northeast corner of the site. The transformers had blue “NO PCB” stickers. Historically, electrical transformers were filled with PCB-containing oil. If corrosion or leaking is noted on an electrical transformer, that could indicate a release of PCBs to the site. The transformers appeared to be in good condition with no staining or signs that would indicate a leak and do not represent a REC.

A potable water well was observed on the northwest portion of the site. This well is further discussed in Section 2.1.3.1. The presence of a potable water well is not considered a REC for the site.

- Indications of on-site underground storage tanks (USTs) or aboveground storage tanks (ASTs) were not observed during the site reconnaissance. Additionally, records of on-site USTs and/or ASTs were not present in regulatory files.
- Potable water is currently provided to the site by on-site wells. Sewer services are provided to the site by residential septic systems.
- Based on a review of the EDR Radius Report™ with GeoCheck® dated November 2, 2023 obtained from Environmental Data Resources, Inc. (EDR), the site was not listed in the searched databases.
- Off-site properties/facilities listed in the EDR Radius Report™ with GeoCheck® dated November 2, 2023 were evaluated for their potential to impact soil, soil vapor, and/or groundwater at the site. Of the facilities listed, none are located within 600 feet of the site boundaries. Of the listed facilities, none are located up-gradient to the site. Based on distance from the site and groundwater gradient, the facilities listed in the EDR report are not considered RECs for the site.
- An environmental lien or activity and use limitations (AULs) search was not provided or requested by the Client for this Phase I ESA. Ninyo & Moore did search the Colorado

Department of Public Health and Environment (CDPHE) Environmental Covenants and Use Restrictions website for the site addresses. Environmental liens and/or AULs were not found for the site.

Conclusions

Ninyo & Moore has performed this Phase I ESA in conformance with the scope and limitations of the ASTM Practice E1527-21 on approximately 16.7 acres of land located northeast of North 87th Street and Clover Basin Drive in Longmont, Boulder County, Colorado. Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of RECs, Controlled RECs (CRECs), or Historical RECs (HRECs) in connection with the site.

Concerning the agricultural history of the site and vicinity, irrigated cultivated surficial soils can become contaminated with hazardous substances as a result of the application of agricultural chemicals. Certain organochlorine pesticides are persistent in the environment and residual pesticide concentrations in surface soils are consequently a possible contaminant on irrigated agricultural sites. We encountered no evidence during review of historic information suggesting that the site contained an agricultural chemical mixing or staging area, or manufacturing or warehousing facility, where pesticide residuals in soils could accumulate at concentrations greater than those that can occur as a result of normal cultivated field applications. Based on these circumstances, the health risk associated with former applications of agricultural chemicals to the property is likely low.

Recommendations

Ninyo & Moore understands the site is proposed to be residentially developed; therefore, shallow soil samples should be collected across the site and analyzed for pesticides and herbicides based on the agricultural history of the site and vicinity. Additionally, a Materials Management Plan (MMP) should be developed for the site and implemented during future redevelopment activities based on the buildings developed as the site from at least the 1900s. The MMP would address any possible asbestos-containing materials (ACM) in the subsurface from the demolition of any former buildings and would also address any additional unforeseen environmental impacts that may be encountered during redevelopment activities.

Certification Statement

This report has been prepared by the staff of Ninyo & Moore for Vista Residential Partners under the professional supervision of the principal and/or senior staff whose signatures appear hereon.

Neither Ninyo & Moore, nor any staff member assigned to this assessment, has any interest or contemplated interest, financial or otherwise, in the subject or surrounding properties, or in any entity which owns, leases, or occupies the subject or surrounding properties or which may be responsible for environmental issues observed during the course of this assessment, and has no personal bias with respect to the parties involved.

The information contained in this report has received appropriate technical review and approval. The conclusions represent professional judgments founded upon the findings of the assessment summarized in the report and the interpretation of such data based on our experience and expertise according to the existing standard of care. No other warranty or limitation exists, either expressed or implied.

Anyone seeking defenses to Comprehensive Environmental Response, Compensation and Liability Act liability must take independent action to protect their position.

1 INTRODUCTION

Ninyo & Moore conducted a Phase I Environmental Site Assessment (ESA) on approximately 16.7 acres of land located northeast of North 87th Street and Clover Basin Drive in Longmont, Boulder County, Colorado (site). The site is addressed as 8902, 8840, and 8800 Quail Road and designated as Boulder County Assessor's Parcel Numbers (APNs) 131517200031 (8902 Quail Road), 131517200030 (8902 Quail Road), 131517200004 (8840 Quail Road), and 131517200022 (8800 Quail Road). This Phase I ESA was conducted for Vista Residential Partners as part of the due diligence process prior to purchase and redevelopment of the property.

This Phase I ESA meets the criteria set forth in the ASTM International (ASTM) E1527-21, was conducted by an Environmental Professional as defined by §312.10 of 40 CFR 312, and satisfies all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. The following sections identify the purpose, the involved parties, the scope of services, and the limitations and exceptions associated with this Phase I ESA.

1.1 Purpose

In accordance with the ASTM E1527, the goal of the process established by E1527 is to identify recognized environmental conditions (RECs). The term recognized environmental condition means *"the presence or likely presence of any hazardous substances or petroleum products in, on, or at the property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions."*

Identification of RECs fall into three categories: an existing REC (as defined above), a Historical REC, or a Controlled REC, as defined below.

Historical Recognized Environmental Condition (HREC) – An HREC is defined as "a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls" (such as property use restrictions, activity and use limitations (AULs), institutional controls, or engineering controls). A HREC is an environmental condition which in the past would have been considered a REC, but which may or may not be considered a REC currently. An example of a HREC is a former gas station where a release of gasoline had occurred, but the site was cleaned up to an unrestricted land use standard. A *historical recognized environmental condition* is not a *recognized environmental condition*."

Controlled Recognized Environmental Condition (CREC) – A CREC is defined as a “recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority” (as evidenced by the issuance of a “No Further Action” letter or equivalent, or meeting risk-based criteria established by regulatory authority). Hazardous substances or petroleum products are allowed to remain in place, subject to the implementation of required controls such as property use restrictions, AULs, institutional controls, or engineering controls. An example of CREC is a former gas station where a release of gasoline has been cleaned up to a commercial use standard, but does not meet unrestricted residential cleanup criteria.

1.2 Involved Parties

Mr. Eric P. Brownson, Principal Geologist with Ninyo & Moore, was the Environmental Professional assigned to this project. Ms. Cara Jacobs, Project Environmental Scientist with Ninyo & Moore conducted the site reconnaissance, performed regulatory inquiries, historical research, document review, and report preparation. Mr. Brownson provided a principal level review of the report. Resumes of these individuals are included in Appendix A.

1.3 Scope of Services

Ninyo & Moore's scope of services for this Phase I ESA included the following:

- Performed a site reconnaissance to visually and/or physically observe the interior and exterior of structures and other features on the site, as well as observe visible exterior features of adjoining properties to observe areas of possibly contaminated surface soil or surface water, improperly stored hazardous materials, and possible risks of contamination from activities at the site and adjoining properties.
- Reviewed reasonably ascertainable standard environmental record sources including federal, state, and tribal regulatory agency databases for the site and for properties located within a specified radius of the site included in a Radius Report from a certified environmental database company. Sources included, but were not limited to, databases maintained by the United States Environmental Protection Agency, Colorado Department of Public Health and Environment, and Colorado Division of Oil and Public Safety. A complete list and explanation of databases searched is included on pages GR-1 through GR-28 of the Environmental Data Resources (EDR) Radius Report in Appendix C. The purpose of this review was to evaluate possible environmental impacts to the site.
- Reviewed reasonably ascertainable additional environmental record sources including local records and/or additional federal, state, or tribal records for the site and for properties located within a specified radius of the site. Sources include, but are not limited to, databases maintained by the United States Environmental Protection Agency, Colorado Department of Public Health and Environment, Colorado Division of Oil and Public Safety, and Environmental Data Resources (EDR). A complete list and explanation of databases searched is included on pages GR-1 through GR-28 of the EDR Radius Report in Appendix C. The purpose of this review was to evaluate possible environmental impacts to the site.

- Reviewed reasonably ascertainable standard physical setting sources including a current United States Geological Survey (USGS) 7.5-minute topographic map, and USGS and/or state groundwater and geologic maps, and soil maps, as needed. The purpose of this review was to note information about the geologic, hydrologic, and/or topographic characteristics of the site and site vicinity.
- Reviewed reasonably ascertainable standard historical sources including aerial photographs, historical fire insurance rate maps, and city directories, as available. The purpose of this review was to review obvious uses of the site from the present, back to the site's first developed use, or back to 1940, whichever is earlier.
- Conducted interviews with present owners, operators, and/or occupants of the site as well as other knowledgeable parties as appropriate. The purpose of these interviews was to obtain information regarding RECs. Agencies contacted included CDPHE Air Pollution Control Division (APCD), CDPHE Hazardous Materials and Waste Management Division (HMMWD), CDPHE Water Quality Control Division (WQCD), and the Colorado OPS, as appropriate. Details regarding personnel interviewed from these agencies are included in Section 4.3 of this report.
- Prepared this ESA report documenting the methodology, significant data gaps, and findings and opinions regarding identified RECs, HRECs, and CRECs.

1.4 Tasks Not Undertaken

In accordance with ASTM E1527-21, the following, which is not intended to be all inclusive, represents out-of-scope items with respect to this Phase I ESA and, therefore, were not addressed: asbestos, radon, lead-based paint, lead in drinking water, regulatory compliance, cultural and historical risk, industrial hygiene, health and safety, indoor air quality, and high voltage power lines. In addition, Ninyo & Moore did not address interpretations of zoning regulations, building code requirements, or property title issues.

1.5 Limitations and Exceptions

The environmental services described in this report have been conducted in general accordance with current regulatory guidelines and the standard of care exercised by environmental consultants performing similar work in the project area. No other warranty, expressed or implied, is made regarding the professional opinions presented in this report.

This document is intended to be used only in its entirety. No portion of the document, by itself, is designed to completely represent any aspect of the project described herein. Ninyo & Moore should be contacted if the reader requires any additional information or has questions regarding the content, interpretations presented, or completeness of this document.

Our conclusions, recommendations, and opinions are based on an analysis of the observed site conditions and the referenced literature. It should be understood that the conditions of a site could

change with time as a result of natural processes or the activities of man at the subject property or nearby sites. In addition, changes to the applicable laws, regulations, codes, and standards of practice may occur due to government action or the broadening of knowledge. The findings of this report may, therefore, be invalidated over time, in part or in whole, by changes over which Ninyo & Moore has no control.

This report may be relied upon by, and is intended exclusively for, Vista Residential Partners. Any use or reuse of the findings, conclusions, and/or recommendations of this report by parties other than these is undertaken at said parties' sole risk.

Per Section 4.6 of the ASTM E1527-21 Standard, *"an environmental site assessment meeting or exceeding this practice and completed less than 180 days prior to the date of acquisition of the property or (for transactions not involving an acquisition) the date of the intended transaction is presumed to be valid."*

2 PROPERTY OVERVIEW

The following sections describe the location and the current uses of the site. The uses of adjoining properties are also described.

2.1 Property Location and Land Use(s)

2.1.1 Property Location

The site is located northeast of North 87th Street and Clover Basin Drive in Longmont, Boulder County, Colorado. The site consists of approximately 16.7-acres of land and is addressed as 8902, 8840, and 8800 Quail Road. The site is designated as Boulder County APNs 131517200031 (8902 Quail Road), 131517200030 (8902 Quail Road), 131517200004 (8840 Quail Road), and 131517200022 (8800 Quail Road). Information from the Boulder County Assessor's website can be found in Appendix B.

The Site Location is presented on Figure 1 and the Site Plan with additional information concerning the site and surrounding properties is presented on Figure 2.

2.1.2 Adjoining Property Locations and Land Uses

Table 1 lists the properties adjoining the site and associated land use. Based on the nature of the current uses of the adjoining properties and observations made during the site reconnaissance, it is unlikely that the current uses of these properties have impacted the environmental integrity of the site.

Table 1 – Adjoining Properties

Location	Description
North	Quail Road, followed by residences (8747-8847 Quail Road, 9421 Schlagel Street, 9423 North 89 th Street, and 1043-1051 Willow Creek Circle).
South	Clover Basin Drive, followed by residences (3605-3617 Sunflower Circle, 1401-1429 Clover Creek Drive, and 3341-3353 Larkspur Drive).
East	Residential home (3125 Depo Drive) and Wildfire Court, followed by a residential home (1220 Wildfire Court).
West	Residential property (9308 North 87 th Street).

2.1.3 Utilities

2.1.3.1 Source of Potable Water

Potable water is provided to the site by on-site potable water wells. Based on our review of the well search information provided in the Environmental Database Resources, Inc. (EDR) Radius Report dated November 6, 2023, three water wells were mapped at the site:

Permit No. 227064- (8800 Quail Road) – Available records indicated the well was installed in 1954 for lawn and garden irrigation purposes. A replacement pump was installed in 2017. Static water level depth in 2017 was recorded at 15 feet. Records indicated a domestic water well was previously installed at this location and had been plugged and abandoned prior to construction of the current irrigation well.

Permit No. 220950-A (8840 Quail Road) – Available records indicated the well was completed in 2000 to 70 feet and was installed for home garden/lawn irrigation.

Permit No. 4409 – A well abandonment report was located under this permit indicating this well was plugged and abandoned in 1965 because it was not in use. Records indicated the well was installed in 1959 for livestock purposes.

Based on the nature of the wells (irrigation and livestock), the wells are not considered a REC.

2.1.3.2 Sewage Disposal System

The three residences at the site are serviced by residential septic systems.

2.1.3.3 Source of Fuel for Heating and Cooling

Electric and gas utilities used for heating and cooling are provided to the area by Xcel Energy/Public Service Company of Colorado.

2.1.4 Description of Structures, Roads and Other Improvements

As shown on Figure 2, 8800 Quail Road is currently developed with a single-family residence reportedly constructed in 1900, a farm utility building reportedly constructed in 1900, and a barn reportedly constructed in 2004; 8840 Quail Road is currently developed with a single-family residence reportedly constructed in 1968 and a barn reportedly constructed in 1968; and 8902 Quail Road is currently developed with a single-family residence reportedly constructed in 1968 and an open cattle shed reportedly constructed in 1968. The site is accessible from Quail Road to the north.

2.2 Physical Setting

Physical settings can influence migration of hazardous substances in the subsurface as liquids generally flow through more permeable layers of soil and follow the groundwater flow gradient. It is assumed that a release from an up-gradient facility may impact a subject site, while a release at a down-gradient site is less likely to impact a subject site.

2.2.1 Topography

Ninyo & Moore reviewed USGS 7.5 Minute Series, Hygiene, Colorado, Topographic Quadrangle Map, dated 2019. The site is at an approximate elevation of 5,023 feet above mean sea level. The site is generally flat. Regionally, land slopes slightly towards the northeast.

2.2.2 Geology/Hydrogeology

The site is located approximately 8 miles east of the Rocky Mountains within the Denver Basin of the Great Plains geomorphic province. The Great Plains formed during the Laramide Orogeny that uplifted the Rocky Mountains during the late Cretaceous and Early Tertiary and the sediment deposition that followed. As a result of regional uplift, approximately 5 to 10 million years ago, streams began down cutting and excavating into the High Plains forming the Colorado Piedmont Section (Trimble, 1980).

The EDR Radius Map Report dated November 2, 2023 indicated the site was underlain by Nunn, which is classified as a silty clay loam, well drained, with slow infiltration rates.

2.2.3 Surface Water Bodies

Natural surface water bodies, including streams or other bodies of water, are not present on or adjoining to the site. The nearest body of water is Dry Creek, located approximately 0.20 mile north of the site.

2.2.4 Groundwater

Based on information obtained by Ninyo & Moore during geotechnical drilling conducted at the site on November 9, 2023, groundwater was encountered at depths ranging from 10 to 19 feet bgs across the site at the time of drilling. Groundwater flow direction is assumed to be northeasterly, based on regional topography, which slopes to the northeast. Groundwater gradient is assumed to be south. Groundwater levels and flow direction can fluctuate due to seasonal variations, groundwater withdrawal or injection, and other factors.

2.2.5 Wetlands

The EDR Radius Map Report included a search of the US Fish and Wildlife Services Wetlands Mapper results. Wetlands were not depicted on or adjoining to the site. A copy of the wetlands map is included in the EDR Radius Map Report in Appendix C.

2.2.6 Flood Maps

According to the Federal Emergency Management Agency (FEMA) website accessed November 6, 2023, the site lies in the flood zone classified as Zone X. Zone X designates an area that has been determined to be outside of the 0.2% annual chance floodplain.

3 PROPERTY BACKGROUND

3.1 Interviews

Interviews were conducted by Ninyo & Moore with the objective of obtaining information regarding potential RECs. Interviews with the present owners, operators, and/or occupants of the site, as well as other knowledgeable parties as appropriate, is mandated by ASTM E1527-21.

3.1.1 Current Owner/Site Manager or Occupant

Interviews were not conducted during the site reconnaissance on November 7, 2023 as owners were not available.

3.1.2 Past Owner/Site Manager or Occupant

Past ownership entities were not made available to Ninyo & Moore during the preparation of this ESA. Therefore, interviews with past site owners were not conducted.

3.1.3 State and/or Local Agencies

State and/or local agencies were interviewed regarding available records for the site. These interviews and the records reviewed are summarized in Section 4.3.

3.2 Review of Aerial Photographs

Ninyo & Moore reviewed historical aerial photographs of the site provided by EDR in a report dated November 2, 2023 (EDR, 2023a). The report included aerial photographs that begin in 1937. A listing of the photographs reviewed is presented in Table 2. Copies of the historical aerial photographs are provided in Appendix D.

Based on the review of the aerial photographs listed below, the site was developed with a residence on the northwest corner from at least 1937. The remainder of the site was agricultural crop land from at least 1937 through 1971 when two more residences and associated barns and sheds were constructed on the north portion of the site (the southern portion of the site appeared to continue to be agricultural crop land).

The site vicinity appeared to be agricultural crop land with a roadway to the north from at least 1937 through the early 1970s when residential homes were shown to the north and barns were shown to the west. By the early 1980s, a roadway was shown to the south and a residential home was shown to the east. By the late 1980s, more barns were shown to the west. By 1999, a residential development was shown to the south of the site and several residential homes were shown to the east. No significant changes were noted from the late 1990s through present.

No RECs were identified based on historical aerial photograph review.

Table 2 – Aerial Photographs Summary			
Date	Source	Site	Surrounding Properties
1937 1941	USDA	The site is developed with a residence and barns on the northwest corner. The remainder of the site is agricultural crop land.	Roadway, followed by agricultural crop land to the north; agricultural crop land to the south, east, and west.
1971	USGS	The site is developed with the current three residential homes and multiple	Roadway, followed by residences to the north; agricultural land to the south;

Table 2 – Aerial Photographs Summary

Date	Source	Site	Surrounding Properties
		associated barns and sheds on the north portion. The south portion of the site is agricultural land.	agricultural land to the east; barns and pastures to the west.
1983	USDA	Similar to the 1971 aerial photograph.	Similar to the 1971 aerial photograph, with the addition of a roadway to the south and a residential home to the east.
1988 1994	USGS EDR	Similar to the 1983 aerial photograph.	Similar to the 1983 aerial photograph, with the addition of barns to the west.
1999 2006 2011 2015 2019 2023	USGS/DOQQ USDA/NAIP Google Earth	Similar to the 1994 aerial photograph.	Similar to the 1994 aerial photograph, with the addition of a residential development to the south and residences to the east.

3.3 Review of Topographic Maps

Ninyo & Moore reviewed historical topographic maps of the site provided by EDR in a report dated November 2, 2023 (EDR, 2023b). A listing of the maps reviewed is presented in Table 3 below. Copies of the historical topographic maps are provided in Appendix D.

The review of topographic maps listed below showed no buildings on the site from at least 1904 through 1950 when one building was shown on the northwest corner. By 1971, four buildings were shown on the north portion of the site. A roadway followed by a building was shown to the north of the site from at least 1904. Several additional buildings were shown to the north of the site by 1971. Several buildings were shown to the west of the site by 1979. A roadway was shown to the south of the site by 2013. The 2013 through 2019 topographic maps do not show buildings on or adjoining to the site.

No RECs were identified based on historical topographic map review.

Table 3 – Topographic Maps Summary

Date	Quadrangle	Uses
1904	Niwot	Buildings are not shown on the site. A roadway followed by a building is shown to the north.

Table 3 – Topographic Maps Summary

Date	Quadrangle	Uses
1950	Hygiene	One building is shown on the northwest corner of the site. A roadway is shown to the north.
1971	Hygiene	Four buildings are shown on the north portion of the site. A roadway is shown to the north, followed by several buildings.
1979	Hygiene	Similar to the 1971 map, with the addition of several buildings to the west.
2013 2016 2019	Hygiene	This map does not show buildings on or adjoining to the site. Roadways are shown to the north and south.

3.4 Review of Fire Insurance Maps

Ninyo & Moore reviewed the EDR Certified Sanborn Map Report, dated November 2, 2023 (EDR, 2023c) for historical fire insurance rate maps (Sanborn Maps) of the site. Sanborn Map coverage was not available for the site and/or adjoining areas. A copy of the EDR Sanborn Map Report is included in Appendix D.

3.5 Review of Reverse City Directories

Ninyo & Moore reviewed the EDR City Directory Image Report, dated November 7, 2023 (EDR, 2023d), for the site and adjoining properties, to evaluate facilities of potential concern, which may have been historically located on or adjoining to the site. City directories for the site and adjoining properties were researched from 1932 through 2020.

The site was listed in the searched city directories as the following:

8800 Quail Road (site)

2005-2020 – Ben Bohren

2000 – Occupant unknown

1992-1995 – Keith Brown

8840 Quail Road (site)

2020 – Charles Ward; Elinor Ward

1995-2017 – Charles Ward

8902 Quail Road (site)

2020 – Jennifer Kaessner; Linda Kaessner: Michael Kaessner: Samuel Kaessner

1995-2017 – Michael Kaessner

Adjoining properties were listed in the searched city directories as the following:

8847 Quail Road (adjoining north)

2000-2020 – Wyllys Newcomb

1995 – Kenneth Coughlin

8906 Quail Road (adjoining east)

2014 – David King

2005 – Crystal Hodge

1992-2000 – Jason Bickler

Review of the City Directory listings did not identify any RECs associated with the site or adjoining properties. A copy of the EDR City Directory Image report is included in Appendix D.

3.6 Title Records

Title records were not provided to Ninyo & Moore. According to the Boulder County Assessor, APN 131517200004 is currently owned by 8840 Quail LLC, APN 131517200022 is currently owned by Bohren Benjamin F & Melanie J, APN 131517200030 is currently owned by Ward Charles & Elinor Living Trust, and APN 131517200031 is currently owned by Kaessner Linda Lee & Michael J.

3.7 Recorded Environmental Covenants and AULs

Ninyo & Moore conducted an on-line search of the GIS database maintained by the Colorado Department of Public Health and Environment (CDPHE) depicting environmental covenants in Colorado (CDPHE, 2023). Environmental liens and/or AULs were not found for the site.

3.8 Previous Investigations

Previous investigations for the site were not provided to Ninyo & Moore for review.

3.9 User-Provided Information

The following sections summarize information provided by the user to assist the Environmental Professional in identifying the possibility of RECs and to fulfill the user's Title Records responsibilities in accordance with Section 6 of ASTM E1527-21.

A User Questionnaire was completed by Mr. Tyler Erickson with Vista Residential Partners, the client, on November 3, 2023. A copy of the completed user questionnaire is included in Appendix B.

3.9.1 Environmental Lien and Activity and Use Restriction Search Results

Mr. Erickson indicated he was unaware of any environmental cleanup liens and/or AUL filed or recorded for the site. He did indicate he was aware of oil and gas leases for the property.

3.9.2 Specialized Knowledge

Mr. Erickson indicated he had no specialized knowledge related to the property.

3.9.3 Relationship of Purchase Price to Fair Market Value

Mr. Erickson indicated the purchase price being paid for the property reasonably reflects fair market value.

3.9.4 Commonly Known or Reasonable Ascertainable Information

Mr. Erickson indicated no commonly known or reasonably ascertainable information about the property.

3.9.5 Degree of Obviousness

Mr. Erickson was not aware of any obvious indicators that point to the presence or likely presence of contamination at the property.

3.9.6 Owner, Property Manager, and Occupant Information

According to the Boulder County Assessor, APN 131517200004 is currently owned by 8840 Quail LLC, APN 131517200022 is currently owned by Bohren Benjamin F & Melanie J, APN 131517200030 is currently owned by Ward Charles & Elinor Living Trust, and APN 131517200031 is currently owned by Kaessner Linda Lee & Michael J.

4 REGULATORY DATABASE SEARCH AND SIGNIFICANT FINDINGS

EDR performed a computerized environmental information database search for the site and site vicinity on November 2, 2023. The EDR Radius Map Report (EDR, 2023e) included federal, state, and local databases. The review was conducted to evaluate whether or not the site or nearby properties have been listed as having experienced unauthorized releases of hazardous substances or petroleum products that may have impacted the site. A list of the environmental databases searched and their corresponding search distance is included in the EDR Radius Map Report, presented in Appendix C.

A summary of the environmental databases searched, their corresponding search distance, and the number of listed properties of potential environmental concern to the site are presented in the Summary of Environmental Record Sources Database Search Table 4 below. Off-site facilities are discussed individually in Section 4.2 with regard to potential impacts to the site.

Table 4 – Summary of Environmental Records Sources Database Search			
Database Name	Agency	Search Radius (miles)	#Facilities
Standard Federal Record Sources			
Corrective Action Reports (CORRACTS)	USEPA	1.00	1
Resource Conservation and Recovery Act (RCRA) Very Small Quantity Generator (VSQG)	USEPA	0.25	1
Additional Environmental Record Sources			
RCRA Non-Generator/No Longer Regulated (NonGen/NLR)	USEPA	0.25	2
PFAS ECHO	USEPA	0.25	2

4.1 Subject Property

The site was not listed on the searched databases.

4.2 Surrounding Properties

Off-site properties/facilities listed in Table 4 above were evaluated for their potential to impact soil, soil vapor, and/or groundwater at the site. Of the facilities listed, none are located within 600 feet of the site boundaries. Of the listed facilities, none are located up-gradient to the site. Based on distance from the site and groundwater gradient, the facilities listed in Table 4 are not considered RECs for the site.

4.3 Freedom of Information Act/Colorado Open Records Act

Local and state departments were interviewed regarding available records for the site. Results of the interviews and file reviews are discussed below. Copies of requests and responses, including public records, are included as Appendix E.

4.3.1 Colorado Department of Public Health and Environment

Ninyo & Moore requested records from the CDPHE, Air Pollution Control Division (APCD) on November 13, 2023. A representative of the CDPHE APCD Records Unit, responded by e-mail on November 15, 2023, indicating that no records were located for the site.

Ninyo & Moore requested records from the CDPHE, Hazardous Materials and Waste Management Division (HMWMD) on November 13, 2023. Mr. Robb Farquhar, representative of the HMWMD, responded by e-mail on November 13, 2023, indicating that no records were located for the site.

Ninyo & Moore searched the CDPHE, Water Quality Control Division (WQCD) Record Management (CDPHERM) system on November 13, 2023 for records associated with the site. No records were located for the site.

4.3.2 Colorado Division of Oil and Public Safety (OPS)

Ninyo & Moore requested documentation for the site from the CDLE OPS on November 13, 2023. A representative of the CDLE OPS responded by e-mail on November 13, 2023, indicating no records were located for the site.

4.3.3 United States Environmental Protection Agency (USEPA)

Ninyo & Moore conducted an online search of the USEPA's MyPropertyInfo database for the site and the vicinity on November 13, 2023. The site or properties in the vicinity were not located on the database.

4.3.4 Other local governments/agencies

Ninyo & Moore requested documentation for the site from Boulder County on November 16, 2023. As of the date of this report, no response has been received Boulder County. If information is received at a later date that alters Ninyo & Moore's conclusions and/or recommendations, an addendum will be submitted.

Ninyo & Moore searched the Colorado Oil and Gas Conservation Commission (COGCC) website for any oil/gas wells on or adjoining to the site. According to the COGCC website, no

oil/gas wells are mapped on or adjoining to the site. The closest oil/gas well is located over 0.25-mile southeast of the site.

5 SITE RECONNAISSANCE

The following sections provide a general description of the site and adjoining properties at the time of the site reconnaissance. Photographs taken during the site reconnaissance are provided in Appendix F.

5.1 Site Reconnaissance

The site reconnaissance was conducted on November 7, 2023, by Ms. Cara Jacobs, Project Environmental Scientist with Ninyo & Moore. At the time of the site reconnaissance, 8800 Quail Road was developed with a single-family residence reportedly constructed in 1900, a farm utility building reportedly constructed in 1900, and a barn reportedly constructed in 2004; 8840 Quail Road was developed with a single-family residence reportedly constructed in 1968 and a barn reportedly constructed in 1968; and 8902 Quail Road was developed with a single-family residence reportedly constructed in 1968 and an open cattle shed reportedly constructed in 1968.

Table 5 below summarizes key on-site observations for indications of the following potential environmental concerns. Conditions of significant concern are discussed following Table 5.

Table 5 – On-Site Observations			
Conditions	Not Observed or Noted	Observed or Noted	Significant Concern?
Hazardous Substances/Petroleum Products	X		
Storage Tanks (ASTs and/or USTs)/Vents/Fill Pipes	X		
Building Foundations/Concrete Patches or Pads	X		
Chemical/Petroleum Odors or Staining	X		
Drums/Other Containers	X		
Debris	X		
Pools of Liquid	X		
Transformers/Potentially PCB-Containing Materials		X	No
Pits, Ponds, Lagoons	X		
Solid Waste	X		

Table 5 – On-Site Observations

Conditions	Not Observed or Noted	Observed or Noted	Significant Concern?
Wells/Stand-Pipe		X	No
Stressed Vegetation	X		
Floor Drains/Sumps/Sand Traps	X		
Elevator	X		
Waste or Storm Water Discharges/Disposal Systems	X		
Septic Systems/Cesspools	X		
Other Notable Features	X		

5.1.1 Transformers/Potentially PCB-Containing Materials

Three pole-mounted transformers were observed at the site: one on the northwest portion, one on the north boundary, and one on the northeast corner of the site. The transformers had blue “NO PCB” stickers. Historically, electrical transformers were filled with PCB-containing oil. If corrosion or leaking is noted on an electrical transformer, that could indicate a release of PCBs to the site. The transformers appeared to be in good condition with no staining or signs that would indicate a leak and do not represent a REC.

5.1.2 Wells/Stand-Pipes

A potable water well was observed on the northwest portion of the site. This well was further discussed in Section 2.1.3.1. The presence of a potable water well is not considered a REC for the site.

5.2 Adjoining Properties

Adjoining properties were described in Section 2.1.2. Based on our review of agency files, along with the nature of the current uses of the adjoining properties and observations made during the site reconnaissance, it is unlikely that the current uses of these properties have impacted the environmental integrity of the site.

6 VAPOR MIGRATION

Ninyo & Moore conducted a preliminary vapor encroachment screen (pVES) for potential chemicals of concern (COCs) that may migrate as vapors onto the site as a result of contaminated soil and/or groundwater near the site. The purpose of the pVES is to identify a vapor

encroachment condition (VEC), which is the presence or likely presence of COC vapors in subsurface soils at the site caused by the release of vapors from contaminated soil or groundwater either on or near the site. The potential for VEC beneath the site was evaluated using a Vapor Encroachment Screening Matrix (VESM). The VESM included performing a Search Distance Test to identify if there are any known or suspect contaminated sites surrounding or up-gradient of the site within specific search radii, a COC Test (for those known or suspect contaminated sites identified within the Search Distance Test) to evaluate whether or not COCs are likely to be present, and a Critical Distance Test to evaluate whether or not COCs in a contaminated plume may be within the critical distance of the site (100 feet for non-petroleum contaminants, and 30 feet for petroleum hydrocarbon contaminants).

Based on the results of the VESM it is unlikely a VEC currently exists beneath the site. A copy of the VESM is included in Appendix G.

7 FINDINGS AND OPINIONS

Based on the results of this ESA, the following findings, opinions, conclusions and recommendations are provided.

7.1 Known or Suspect Recognized Environmental Conditions

This assessment has revealed no evidence of RECs.

7.2 Controlled Recognized Environmental Conditions

This assessment has revealed no evidence of CRECs in connection with the site.

7.3 Historical Recognized Environmental Conditions

This assessment has revealed no evidence of HRECs in connection with the site.

8 DATA GAPS

The following data gaps were encountered during the Phase I ESA:

- Ninyo & Moore requested documentation for the site from Boulder County on November 16, 2023. As of the date of this report, no response has been received by Boulder County.
- Interviews were not conducted during the site reconnaissance on November 7, 2023 as owners were not available. Additionally, past ownership entities were not made available to Ninyo & Moore during the preparation of this ESA. Therefore, interviews with past site owners were not conducted.

Based on the history of the site, these limitations do not constitute a significant data gap and did not affect the Environmental Professional's ability to identify RECs.

9 CONCLUSIONS

Ninyo & Moore conducted a Phase I ESA on approximately 16.7 acres of land located northeast of North 87th Street and Clover Basin Drive in Longmont, Boulder County, Colorado.

In general, the following items were noted:

- Review of historical resources indicated the site was developed with a residence on the northwest corner from at least 1900. The remainder of the site was agricultural crop land from at least 1937 through 1968 when two more residences and associated barns and sheds were constructed on the north portion of the site (the southern portion of the site appeared to continue to be agricultural crop land).

The site vicinity appeared to be agricultural crop land with a roadway to the north from at least 1937 through the early 1970s when residential homes were shown to the north and barns were shown to the west. By the early 1980s, a roadway was shown to the south and a residential home was shown to the east. By the late 1980s, more barns were shown to the west. By 1999, a residential development was shown to the south of the site and several residential homes were shown to the east. No significant changes were noted from the late 1990s through present.

Concerning the agricultural history of the site, irrigated cultivated surficial soils can become contaminated with hazardous substances as a result of the application of agricultural chemicals. Certain organochlorine pesticides are persistent in the environment and residual pesticide concentrations in surface soils are consequently a possible contaminant on irrigated agricultural sites. We encountered no evidence during review of historic information suggesting that the site contained an agricultural chemical mixing or staging area, or manufacturing or warehousing facility, where pesticide residuals in soils could accumulate at concentrations greater than those that can occur as a result of normal cultivated field applications. Based on these circumstances, the health risk associated with former applications of agricultural chemicals to the property is likely low.

- On November 7, 2023, Ms. Cara Jacobs, Project Environmental Scientist with Ninyo & Moore, conducted a site reconnaissance. Ms. Jacobs conducted the site reconnaissance unaccompanied. The reconnaissance involved visual observation of the site and adjoining properties.
- At the time of the site reconnaissance, 8800 Quail Road was developed with a single-family residence reportedly constructed in 1900, a farm utility building reportedly constructed in 1900, and a barn reportedly constructed in 2004; 8840 Quail Road was developed with a single-family residence reportedly constructed in 1968 and a barn reportedly constructed in 1968; and 8902 Quail Road was developed with a single-family residence reportedly constructed in 1968 and an open cattle shed reportedly constructed in 1968.
- The northern adjoining property is developed with Quail Road followed by residences (8747-8847 Quail Road, 9421 Schlagel Street, 9423 North 89th Street, and 1043-1051 Willow Creek Circle). The eastern adjoining property is developed with a residential home (3125 Depo Drive) and Wildfire Court, followed by a residential home (1220 Wildfire Court). The southern adjoining property is developed with Clover Basin Drive, followed by residences (3605-3617

Sunflower Circle, 1401-1429 Clover Creek Drive, and 3341-3353 Larkspur Drive). The western adjoining property is developed with a residence and barns (9308 North 87th Street). Based on observations made during the site reconnaissance and review of agency file information, the adjoining properties were not identified as a REC.

- During the site reconnaissance, no hazardous substances or petroleum products were observed on or adjoining to the site.

Three pole-mounted transformers were observed at the site: one on the northwest portion, one on the north boundary, and one on the northeast corner of the site. The transformers had blue “NO PCB” stickers. Historically, electrical transformers were filled with PCB-containing oil. If corrosion or leaking is noted on an electrical transformer, that could indicate a release of PCBs to the site. The transformers appeared to be in good condition with no staining or signs that would indicate a leak and do not represent a REC.

A potable water well was observed on the northwest portion of the site. This well is further discussed in Section 2.1.3.1. The presence of a potable water well is not considered a REC for the site.

- Indications of on-site USTs or ASTs were not observed during the site reconnaissance. Additionally, records of on-site USTs and/or ASTs were not present in regulatory files.
- Potable water is currently provided to the site by on-site wells. Sewer services are provided to the site by residential septic systems.
- Based on a review of the EDR Radius Report™ with GeoCheck® dated November 2, 2023 obtained from EDR, the site was not listed in the searched databases.
- Off-site properties/facilities listed in the EDR Radius Report™ with GeoCheck® dated November 2, 2023 were evaluated for their potential to impact soil, soil vapor, and/or groundwater at the site. Of the facilities listed, none are located within 600 feet of the site boundaries. Of the listed facilities, none are located up-gradient to the site. Based on distance from the site and groundwater gradient, the facilities listed in the EDR report are not considered RECs for the site.
- An environmental lien or AULs search was not provided or requested by the Client for this Phase I ESA. Ninyo & Moore did search the CDPHE Environmental Covenants and Use Restrictions website for the site addresses. Environmental liens and/or AULs were not found for the site.

Ninyo & Moore has performed this Phase I ESA in general conformance with the scope and limitations of ASTM Practice E 1527-21 on approximately 16.7 acres of land located northeast of North 87th Street and Clover Basin Drive in Longmont, Boulder County, Colorado. Any exceptions to, or deletions from, this practice are described in Section 11 of this report.

This assessment has revealed no evidence of RECs, CRECs, or HRECs in connection with the site or adjoining properties.

Concerning the agricultural history of the site, irrigated cultivated surficial soils can become contaminated with hazardous substances as a result of the application of agricultural chemicals.

Certain organochlorine pesticides are persistent in the environment and residual pesticide concentrations in surface soils are consequently a possible contaminant on irrigated agricultural sites. We encountered no evidence during review of historic information suggesting that the site contained an agricultural chemical mixing or staging area, or manufacturing or warehousing facility, where pesticide residuals in soils could accumulate at concentrations greater than those that can occur as a result of normal cultivated field applications. Based on these circumstances, the health risk associated with former applications of agricultural chemicals to the property is likely low.

10 RECOMMENDATIONS

Ninyo & Moore understands the site is proposed to be residentially developed; therefore, shallow soil samples should be collected across the site and analyzed for pesticides and herbicides based on the agricultural history of the site and vicinity. Additionally, an MMP should be developed for the site and implemented during future redevelopment activities based on the buildings developed as the site from at least the 1900s. The MMP would address any possible ACM in the subsurface from the demolition of any former buildings and would also address any additional unforeseen environmental impacts that may be encountered during redevelopment activities.

11 LIMITING CONDITIONS/DEVIATIONS

This report was prepared in accordance with ASTM E1527-21. No deviations from the standard occurred in this ESA. Based on the information gathered by Ninyo & Moore for the purposes of this ESA, it is Ninyo & Moore's opinion the data obtained from the site reconnaissance, records reviewed, and interviews conducted, is adequate to make a conclusion on the environmental condition of the site with respect to the existence or lack of RECs associated with the site.

13 ENVIRONMENTAL PROFESSIONAL STATEMENT

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined by §312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Resumes

Eric P. Brownson, PG

Principal Geologist

EDUCATION

B.A., Geology, 1980, University of South Florida

REGISTRATIONS/CERTIFICATIONS

PG 371 (Florida)

OSHA 10-Hour Construction Safety

OSHA 40-Hour HAZWOPPER

OSHA 8-Hour Refresher Training

As a Principal Geologist, Mr. Brownson is responsible for the oversight and management of the environmental engineering services provided by Ninyo & Moore's Colorado offices, and providing technical guidance and support to the professional staff. As a registered professional geologist, Mr. Brownson has extensive experience in environmental site assessments (ESAs), SPCC plans, environmental compliance inspections, UST system installations, removals and testing, soil and groundwater contamination investigations, geophysical investigations, groundwater contaminant transport modeling, remediation system design, installation, operation, and maintenance. Project experience includes gasoline stations, bulk petroleum facilities, petroleum pipelines, chemical distribution facilities, automotive repair, dry cleaners, fertilizer manufacturing and storage facilities, landfills, power plants, manufacturing plants, printing facilities, and military bases.

EXPERIENCE

Environmental Services, Western United States: Environmental Services Manager responsible for oversight and quality control of report content, execution of environmental site assessments (ESAs), spill prevention, control and countermeasures (SPCCs), environmental compliance inspections, asbestos surveys and asbestos abatement oversight, and property condition assessment (PCA) in several western states including Colorado, Montana, Idaho, Nevada, Arizona, New Mexico, California, and Utah. Additional project duties included oversight on underground storage tank (USTs), removals and cleanup on commercial properties and providing environmental liability estimates for impacted properties.

Tyndall Air Force Base Installation Restoration, FL: Senior Project Manager providing primary base management for the FYI 1 and FYI 3 PBR contracts totaling \$63M. Responsibilities included preparation of command updates, participation in PBC scope of work development, and interaction with AFCEC, USACE, AETC and SAF/IE, analyses of task order budgets and schedules, preparing RACER and CTC estimates, reviewing contractor deliverables, and performance. Projects include former Fire Training areas, vehicle maintenance, POL storage and piping facilities, and MMRP sites.

CERCLA Site Oversight, MS: Provided project management and technical oversight for a CERCLA site in Mississippi involving chlorinated hydrocarbon-impacted soil (source area) and public drinking water wells. Project involvement included designing a 450-gpm ground-water extraction system and a 4,000-cfm soil vapor extraction system, preparing necessary design reports and coordinating and oversight of the system installation.

UIC Inspection Program, Florida Department of Environmental Protection, FL: Development and implementation of Florida Underground Injection Control (UIC) regulations. Developed the initial statewide UIC compliance inspection program for the Florida FDEP. Participated and chaired in the Technical Advisory Committees consisting of technical experts from the USEPA, USGS, Florida Water Management Districts, and the FDEP, in review of design and construction of Class I injection wells at 15 facilities throughout Florida.

Eric P. Brownson

Principal Geologist

Georgia Department of Transportation (DOT), GA: Managed and prepared numerous Environmental Site Assessments for Georgia DOT right-of-ways and inspections of railroad crossings within the state.

Mud Logging, Rocky Mountain Region, United States: Mud logger and well-site geologist in the Rocky Mountain region including Williston, Bighorn, Wind River, DJ, Great Divide, and Anadarko Basins, and North Slope of Alaska. Exploration experience includes preparation of geologic logs, evaluation of geophysical logging, directional drilling coring, and drill stem testing.

Mixed Use Developments/Real Estate Projects, Statewide, FL: Environmental Services Department Manager for several large mixed-use developers, law firms, financial institutions, and real estate investment trust clients. Management duties included project tracking, budget development, business development, proposal preparation, report preparation and review, and providing status updates to clients and company shareholders. Project responsibilities included environmental site assessments, asbestos surveys and abatement, lead-based paint surveys, contamination assessments, UST removal and closure reporting, and site remediation involving VOCs, SYOCs, and metals.

Landfill Projects, Southwest Region, FL: Provided regulatory and technical review of engineering and geologic reports in support of environmental permitting for construction and monitoring at more than 100 landfills, sewage effluent disposal spray fields and ponds, and hazardous and industrial waste sites in southwest Florida.

Retail Strip Mall Project, Cedar Rapids, IA: Managed and provided technical oversight for a \$300,000 demolition of a retail strip center in Cedar Rapids, IA. Management duties included preparing scope of work, evaluation of subcontractor proposals, awarding contracts and subcontractor oversight. The scope of work included asbestos abatement, building and foundation removal, and excavation of metals contaminated soil from a former railroad bed.

Cara Jacobs

Project Environmental Scientist

EDUCATION

B.A., Journalism, 2008, Pennsylvania State University

CERTIFICATIONS

OSHA 40-Hour Health & Safety Training

OSHA 8-Hour Refresher Training

NOLS Wilderness First Aid Training

As Project Environmental Scientist for the Denver office, Ms. Jacobs provides support for the day-to-day operations including planning, and execution of all projects assigned. She writes proposals, coordinates and conducts Phase I Environmental Site Assessments (ESAs) and wildlife surveys, and assists with Phase II ESAs. Her education includes energy resource management, physical geography, water resources, natural resource use and management, environmental management, land use planning, urban geography, geographic information systems (GIS), and reporting methods. Ms. Jacobs has performed preliminary assessment/site investigations, Phase I ESAs, Phase II ESAs, environmental drilling, soil and water sample collecting, construction dewatering monitoring, air monitoring, and wildlife surveys.

EXPERIENCE

South Platte RiverPlace Initiative Brownfields Assessment project, STEAM on the Platte Redevelopment, 1400 Zuni Street, Denver, Colorado: Assisted with a geophysical survey to locate previously unidentified petroleum underground storage tanks (USTs) discovered on historical Sanborn maps.

Market Street Phase I and Phase II ESAs, Denver, Colorado: Conducted an ASTM E1527-13 compliant Phase I ESA for a potential acquisition for a local redevelopment company. Filling station and drycleaner facilities were previously located on and adjacent to the site. The site was also located in an area known to contain coal-based fill in the subsurface. A Limited Phase II ESA was conducted, and Ms. Jacobs provided drilling oversight, conducted soil and groundwater sampling, and assisted with report preparation.

McDonald Farm Enterprises, Inc., Denver, Colorado: Assisted with soil and groundwater sample collection for a Phase II ESA on a site occupied by an approximately 22,921 square foot (sf) industrial wastewater and used cooking oil treatment facility. Three diesel underground storage tanks (USTs) were removed from the site prior to 1999 and listed on the Leaking Underground Storage Tank (LUST) database. Two of the USTs were reported as unregulated and no assessment was conducted for soil and groundwater. The regulated UST was removed prior to 1999 and may not have been fully characterized. Additionally, historical industrial and railroad activity in the vicinity of the site may have had an impact on the site. Seven soil borings were advanced at the site. One-inch temporary groundwater monitoring wells were installed in the deeper borings.

4747 Packing House Road, Denver, Colorado: Assisted with soil and groundwater sample collection for a Phase II ESA on a site occupied by an approximately 16,892 sf industrial warehouse. Ten soil borings were advanced to assess impacts from two gas tanks discovered on historical Sanborn maps, a brick-lined vault described as an “oil wash-out” basin, a concrete pad that appeared to be a vault access or a former dispenser island, an obsolete transformer, and multiple rusted 55-gallon drums on the property.

Peninsula Boulevard, Jacintoport Boulevard, and Sheldon Road Widening, Houston, Texas: The project consisted of the widening of three roadways and outfall drainage. Ms. Jacobs conducted a Texas Department of Transportation (TxDOT) Categorical Exclusion (CE) that included a Scope Development Tool, a Project Scoping Form, a Biological Evaluation Form, and a Hazardous Materials Initial Site

Cara Jacobs

Project Environmental Scientist

Assessment. A Traffic Noise Analysis was also included as part of the CE, per TxDOT guidelines. The project included a Wetland Delineation with U.S. Army Corps of Engineers (USACE) verification, a Cultural Resources Survey for submittal to the Texas Historical Commission (THC), and a Threatened and Endangered Species Survey.

Wells Fargo, Houston, Texas: Performed a Phase I ESA on a site encompassing approximately 17.3-acres of land developed with a warehouse distribution center for oil-field equipment manufacturing and an office building totaling approximately 112,000 sf in size. The site buildings were a one-story office building, two metal warehouse buildings, a three-bay storage shed, a paint make ready area/metal storage warehouse, and a small metal office building. Report findings for this Phase I ESA revealed Recognized Environmental Conditions (RECs) in connection with the property in the form of soil contamination due to oil release and previous industrial activities at the site. The report recommended a Phase II ESA to further investigate the extent of any soil contamination with five soil borings and the installation of five temporary groundwater monitoring wells.

New York Life Investment Management (NYLIM), Houston, Texas: Performed a Phase I ESA on a site encompassing approximately 10.14-acres of land developed with a 721,788 sf, 4-story apartment complex. The building consisted of fire-resistant steel construction with brick and stone exterior. Report findings for this Phase I ESA revealed no identified RECs in connection with the site, however, a de minimus condition was found due to a Historical Recognized Environmental Condition (HREC) regarding a closed leaking petroleum storage tank (LSPT) reported on the site. The case was closed by the Texas Commission on Environmental Quality (TCEQ) in 2002.

Delta Correctional Center, Delta, Colorado: Performed a Phase I ESA on 36 buildings located within the approximately 1,872-acre Delta Correctional Center. The buildings ranged in size from approximately 85 to 9,500 sf and were utilized by the Delta Correctional Center. Building uses included maintenance, vocational/custodial, support services/mental health, computer labs, pump houses, a clinic, multiple living units, recreation, food services, administrative, laundry, warehouses, service station, a training center, and an armory. Report findings for this Phase I ESA revealed no evidence of RECs, CRECs, or HRECs in connection with the site. The Phase I ESA was conducted for the State of Colorado.

Rifle Correctional Center, Rifle, Colorado: Performed a Phase I ESA on 19 buildings located within the approximately 82-acre Rifle Correctional Center. The buildings ranged in size from approximately 180 to 8,500 sf and were utilized by the Rifle Correctional Center. Building uses included a fire pump house, a greenhouse, recreation, a blower building, a chapel, administration, food services/kitchen, laundry/library, case management, living units, utilities, a maintenance shop, a chlorination building, pump houses, and a water treatment center. Report findings for this Phase I ESA revealed no evidence of RECs or CRECs in connection with the site. The report identified one HREC in connection with the site: one 6,000-gallon gasoline UST and one 4,000-gallon gasoline UST were removed from the site in 1996. The Colorado Department of Labor and Employment (CDLE) issued a No Further Action (NFA) letter for the petroleum contamination associated with the two USTs dated June 8, 2000. The Phase I ESA was conducted for the State of Colorado.

Cedar Creek II Wind Farm, New Raymer, Colorado: Performed a Phase I ESA on the approximately 27,000-acre Cedar Creek II Wind Farm – a 250-megawatt (MW) wind farm project located near New Raymer, Colorado. Construction on the wind farm began in September 2010 and was completed in 2011. The site was developed with 123 wind turbines with associated access roads, underground collection lines, an overhead transmission line (GenTie), an electrical substation, and an O&M building. Report findings for this Phase I ESA revealed no evidence of RECs, CRECs, or HRECs in connection with the site.

APPENDIX B

Assessor's Information and Questionnaires

**PHASE I ESA
USER
QUESTIONNAIRE**

Property Name/Address: 8902 Quail, 8840 Quail, 8800 Quail

Please respond to all of the following questions to the best of your knowledge. The purpose of this questionnaire is to assist the user (the client or party seeking to use the Phase I ESA) and the environmental professional in gathering information from the user that may be material to documenting Recognized Environmental Conditions (RECs) at the site. Please note that the user of the Phase I ESA (the client), if seeking protection from CERCLA liability, must adhere to a set of user responsibilities as defined by the American Society for Testing and Materials (ASTM) Standard Practice E1527-13 and the United States Environmental Protection Agency (EPA) 40 Code of Federal Regulations Part 312 titled "Standards and Practices for all Appropriate Inquiries (AAI)". Failure to provide this information could result in a determination that AAI is not complete.

Per Section 6 of ASTM Standard E1527-13 and 40 CFR Part 312 of the AAI rule, the user's responsibilities include, but are not limited to, the following:

- review reasonably ascertainable land title records, lien records, and/or judicial records to search for environmental cleanup liens or activity and use limitations (AULs) against the site filed or recorded under federal, tribal, state, or local law, or engage a title company to review such records. Evidence of environmental liens and/or activity and use limitations on the site, if discovered, must be provided to the environmental consultant;
- report to the environmental professional specialized knowledge or experience material to RECs in connection with the property;
- report to the environmental professional knowledge of environmental liens or AULs encumbering or in connection with the property;
- consider the relationship of the purchase price of the property to its fair market value and whether a lower purchase price is related to potential contamination;
- report to the environmental professional commonly known or reasonably ascertainable information material to RECs; and
- report to the environmental professional the reason for conducting the Phase I ESA.

User responsibilities, CERCLA liability relief, and AAI components are discussed in the AAI rule and in the ASTM E1527-05 standard.

1) Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).

1a. Have you conducted a search for environmental cleanup liens that are filed or recorded under federal, tribal, state or local law?

☐ Yes ☒ No

If yes, please describe:

1b. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?

☐ Yes ☒ No

If yes, please describe:

2) Activity and land use limitations (AULs) that are in place on the site or that have been filed or recorded in a registry.

2a. Have you conducted a search for the existence of AULs, such as engineering controls, land use restrictions or institutional controls, that have been filed or recorded in a registry under federal, tribal, state or local law?

☒ Yes ☐ No

If yes, please describe: Oil & Gas Leases

2b. Are you aware of any AULs that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

☒ Yes ☐ No

If yes, please describe: Oil & Gas Leases

3) Specialized knowledge or experience of the person seeking to qualify for the liability protections (40 CFR 312.28).

As the user of this Phase I ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

☐ Yes ☒ No

If yes, please describe:

4) Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).

4a. Does the purchase price being paid for this property reasonably reflect the fair market value of the property?

☒ Yes ☐ No ☐ Not applicable (No Property Purchase Involved)

4b. If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

☐ Yes ☒ No If yes, please describe:

5) **Commonly known or reasonably ascertainable information about the property (40 CFA 312.30).**

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as the user,

a) Do you know the past uses of the property?

☐ Yes ☒ No If yes, please describe:

b) Do you know of specific chemicals that are present or once were present at the property?

☐ Yes ☒ No If yes, please describe:

c) Do you know of spills or other chemical releases that have taken place at the property?

☐ Yes ☒ No If yes, please describe:

d) Do you know of any environmental cleanups that have taken place at the property?

☐ Yes ☒ No If yes, please describe:

6) **The degree of obviousness of the presence of likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).**

As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property?

☐ Yes ☒ No If yes, please describe:

7) **What is the reason for having the Phase I ESA performed (ASTM 1527-13, Section 6.7)?**

Future Multifamily Development

8) **Are you aware of any previously prepared documentation for the site, such as:**

- previous Phase I ESA or Phase II ESA reports
- environmental sampling, compliance audit, or assessment reports
- environmental permits
- registrations for aboveground or underground storage tanks
- registrations for underground injections systems
- material safety data sheets (MSDS)
- community right-to-know plans,
- safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans
- geotechnical or hydrogeologic reports
- storm water documents
- risk assessments
- hazardous waste generator notices

☐ Yes ☒ No If yes, please describe:

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 07/24/2023 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
MIYOTA DEVELOPMENT C EPA ID:: COR000001537	2602 CLOVER BASIN DR	E 1/8 - 1/4 (0.243 mi.)	B5	39

Lists of Federal RCRA generators

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 07/24/2023 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
MIYOTA DEVELOPMENT C EPA ID:: COR000001537	2602 CLOVER BASIN DR	E 1/8 - 1/4 (0.243 mi.)	B5	39

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 07/24/2023 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

EXECUTIVE SUMMARY

EPA ID:: COR000003897
DISPLAYTECH INC 2602 CLOVER BASIN E 1/8 - 1/4 (0.243 mi.) B6 52
EPA ID:: COR000000000

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 07/05/2023 has revealed that there are 2 PFAS ECHO sites within approximately 0.25 miles of the target property.

Hazardous Waste Summary:

Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D003
Waste Description: Reactive Waste

Waste Code: D009
Waste Description: Mercury

Waste Code: D011
Waste Description: Silver

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or

More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005

Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F006

Waste Description: Wastewater Treatment Sludges From Electroplating Operations, Except From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis) On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.

Waste Code: F007

Waste Description: Spent Cyanide Plating Bath Solutions From Electroplating Operations.

Waste Code: F008

Waste Description: Plating Bath Residues From The Bottom Of Plating Baths From Electroplating Operations In Which Cyanides Are Used In The Process.

Waste Code: P056

Waste Description: Fluorine

Waste Code: P098

Waste Description: Potassium Cyanide (Or) Potassium Cyanide K(Cn)

Waste Code: P106

Waste Description: Sodium Cyanide (Or) Sodium Cyanide Na(Cn)

Waste Code: U002

Waste Description: 2-Propanone (I) (Or) Acetone (I)

Waste Code: U134

Waste Description: Hydrofluoric Acid (C,T) (Or) Hydrogen Fluoride (C,T)

Waste Code: U154

Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Waste Code: U162

Waste Description: 2-Propenoic Acid, 2-Methyl-, Methyl Ester (I,T) (Or) Methyl Methacrylate (I,T)

Waste Code: U359

Waste Description: Ethanol, 2-Ethoxy- (Or) Ethylene Glycol Monoethyl Ether

Waste Code: D022
Waste Description: Chloroform

Waste Code: D038
Waste Description: Pyridine

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 09/19/2023	Source: EPA
Date Data Arrived at EDR: 10/03/2023	Telephone: N/A
Date Made Active in Reports: 10/19/2023	Last EDR Contact: 11/01/2023
Number of Days to Update: 16	Next Scheduled EDR Contact: 01/08/2024
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 09/19/2023

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 09/19/2023	Source: EPA
Date Data Arrived at EDR: 10/03/2023	Telephone: 800-424-9346

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 07/24/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/31/2023	Telephone: 303-312-6149

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 07/24/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/31/2023	Telephone: 303-312-6149

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Lists of state- and tribal hazardous waste facilities

SHWS: This state does not maintain a SHWS list. See the Federal CERCLIS list and Federal NPL list.

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF: Solid Waste Sites & Facilities

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

TRUST: Lust Trust Sites

Reimbursement application package. The 1989 Colorado General Assembly established Colorado's Petroleum Storage Tank Fund. The Fund reimburses eligible applicants for allowable costs incurred in cleaning up petroleum contamination from underground and aboveground petroleum storage tanks, as well as for third-party liability expenses. Remediation of contamination caused by railroad or aircraft fuel is not eligible for reimbursement. The Fund satisfies federal Environmental Protection Agency financial assurance requirements. Monies in the Fund come from various sources, predominantly the state environmental surcharge imposed on all petroleum products except railroad or aircraft fuel.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013	Source: Environmental Protection Agency

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facility's name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

UMTRA: Uranium Mill Tailings Sites

There were nine uranium mill tailings sites in Colorado designated for cleanup under the federal Uranium Mill Tailings Radiation Control Act. These nine sites, known commonly as UMTRA sites, were remediated jointly by the State of Colorado and the U.S. Department of Energy during the late 1980's and early 1990's. Mill tailings were removed from 8 of the mill sites and relocated in engineered disposal cells. A disposal cell is designed to encapsulate the material, reduce radon emanation, and prevent the movement of water through the material. At one site, Maybell, CO, the tailings were stabilized in-place at the mill site. After remediation of the tailings was completed, the State and DOE began to investigate the residual impacts to groundwater at the mill sites. The groundwater phase of the UMTRA program is on-going.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LF DENVER CO METHANE: Investigation of Methane Gas Hazards

The purpose of this study was to assess the actual and potential generation, migration, explosive and related problem associated with specified old landfills, and to identify existing and potential problems, suggested strategies to prevent, abate, and control such problems and recommend investigative and monitoring functions as may be deemed necessary. Eight sites determined to be priorities due to population density and potential hazards to population and property were selected by the Colorado Department of Health.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/07/2023
Date Data Arrived at EDR: 08/08/2023

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Northeast Map:	14201562 LONGMONT, CO
Version Date:	2019

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

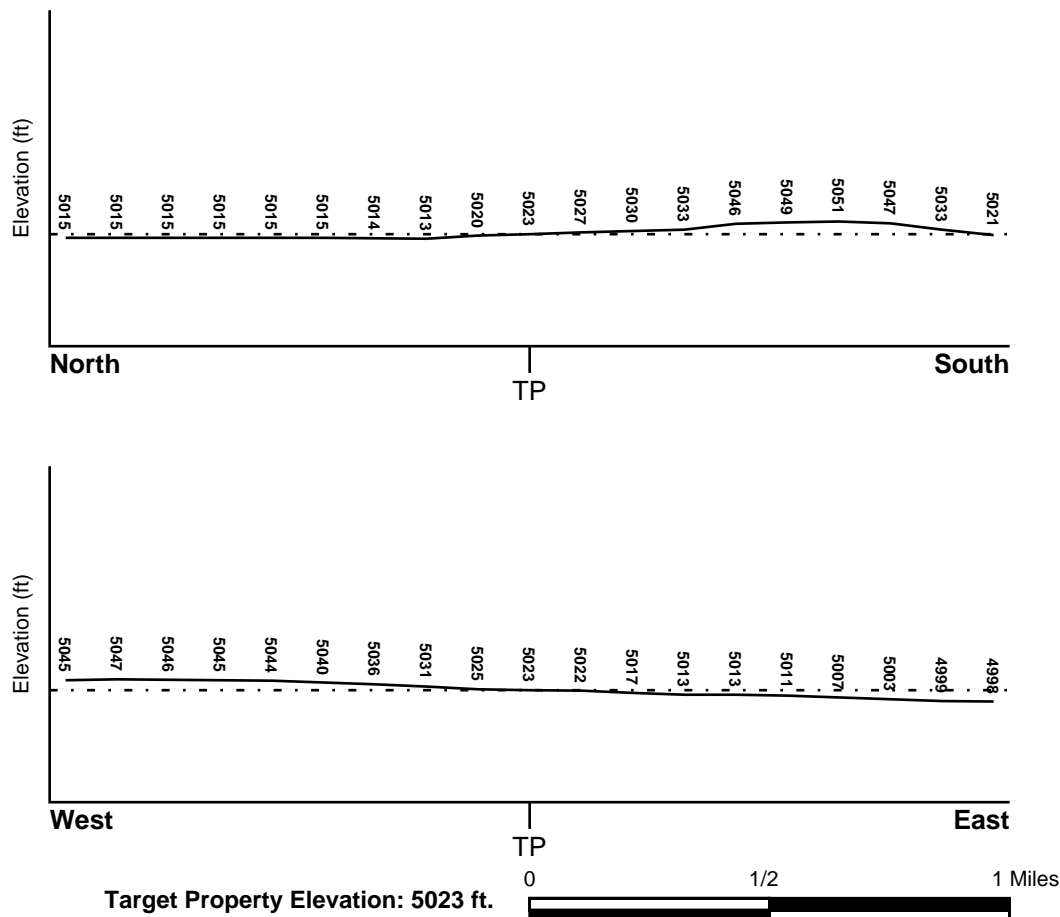

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
08013C0269J	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
08013C0266J	FEMA FIRM Flood data

08013C0268J	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
NOT AVAILABLE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Nunn

Soil Surface Texture: clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 4.23 Min: 0.42	Max: 8.4 Min: 7.9
2	9 inches	18 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 4.23 Min: 0.42	Max: 8.4 Min: 7.9
3	18 inches	29 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 4.23 Min: 0.42	Max: 8.4 Min: 7.9
4	29 inches	59 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 4.23 Min: 0.42	Max: 8.4 Min: 7.9

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Riparian Vegetation Data

Source: Division of Wildlife

Telephone: 970-416-3360

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Colorado GIS Well Database

Source: Office of State Engineer, Division of Water Resources

Telephone: 303-866-3581

Radon Study in Colorado

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Ninyo & Moore were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # DA6B-4650-BF4A

PO # NA

Project 502847002

UNMAPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: DA6B-4650-BF4A

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

Subject: Re: Records request

Hello,

The Air Pollution Control Division found the following.

Stationary Sources Program

8800 Quail Road in Longmont, CO: No records available

8840 Quail Road in Longmont, CO: No records available

8902 Quail Road in Longmont, CO: No records available

Indoor Environmental Program

8800 Quail Road in Longmont, CO: The asbestos/lead database did not have abatement or demolition records (permits) responsive to this address. The presence or absence of a permit is not an indicator of whether asbestos-containing materials or lead-based paint may or may not be present on the property.

8840 Quail Road in Longmont, CO: The asbestos/lead database did not have abatement or demolition records (permits) responsive to this address. The presence or absence of a permit is not an indicator of whether asbestos-containing materials or lead-based paint may or may not be present on the property.

8902 Quail Road in Longmont, CO: The asbestos/lead database did not have abatement or demolition records (permits) responsive to this address. The presence or absence of a permit is not an indicator of whether asbestos-containing materials or lead-based paint may or may not be present on the property.

Thanks,
Jasmin

Subject: Re: Petroleum Storage Tank File Review Request Received!

Hello, Thank you for submitting information for a File Review Request. After searching through our [COSTIS Database](#), I was not able to locate any Facilities for the addresses that were requested.

If you are looking for release data, we now have a self-serve option for searching our maps, which is available here: <https://gis.colorado.gov/openpetroleum/>. With this map, you can find out whether or not a release is within a two-mile radius of a specific location. Releases on this map also have a site summary and a link to the COSTIS page. You could request documents by following <https://cdphe.colorado.gov/public-information/public-records>.

REGISTRATION OF EXISTING WELL

ISSUANCE OF THIS PERMIT DOES NOT CONFER A WATER RIGHT

CONDITIONS OF APPROVAL

- 1) This well shall be used in such a way as to cause no material injury to existing water rights. The issuance of this permit does not assure the applicant that no injury will occur to another vested water right or preclude another owner of a vested water right from seeking relief in a civil court action.
- 2) The construction of this well shall be in compliance with the Water Well Construction Rules 2 CCR 402-2, unless approval of a variance has been granted by the State Board of Examiners of Water Well Construction and Pump Installation Contractors in accordance with Rule 18.
- 3) This well is recorded and permit approved in accordance with CRS 37-92-602(5) for historic use as indicated herein and described in CRS 37-92-602(1)(b), being a well producing 15 GPM and used for fire protection, the watering of domestic animals and poultry, and the irrigation of not more than 20,340 square feet of home gardens and lawns.
- 4) The date of first beneficial use, as claimed by the applicant, is 1954. *EEM 7/5/00*

INSTRUCTIONS FOR THE COMPLETION OF REGISTRATION OF EXISTING WELL

9/26/96

Certain wells not previously registered or permitted may be registered pursuant to C.R.S. 37-92-602(5). The wells must have been constructed and put to beneficial use prior to May 8, 1972. The types of wells that may be registered are identified as follows:

- 1) Wells not exceeding fifteen gpm which are used for ordinary household purposes, fire protection, the watering of poultry, domestic animals and livestock on farms and ranches, and the irrigation of not over one acre of home gardens and lawns, but not used for more than three single family dwellings.
- 2) Wells not exceeding fifty gpm which are in production as of May 22, 1971, and were and are used for the purposes described in (1) above.
- 3) Wells not exceeding fifteen gpm which are used for drinking and sanitary facilities in individual commercial businesses.
- 4) Wells used exclusively for fire-fighting purposes if the wells are capped, locked and are used only in fighting fires.
- 5) Wells within Designated Groundwater Basins may be registered provided they do not exceed 50 gpm and are used for not more than three single family dwellings and the irrigation of not over one acre of home gardens and lawns, or the watering of livestock on range and pasture. They may be used in one commercial business, but may be further restricted by applicable Ground Water Management District Rules and Regulations.

The Form must be typewritten or printed in **BLACK INK**. Initial and date any changes you make on the form. Incomplete forms are not acceptable and will be returned. Attach additional sheets if more space is needed.

The non-refundable fee for filing a late registration is \$60.00 payable to the "State Engineer". If the late registration is accompanied by an application for a permit to replace the existing well in the same aquifer, there is no additional fee.

1. Print the well owner's name and include the mailing address and phone number.
2. If the well location is different than the mailing address of the owner, include the address where the well is located. North Well. The actual well location must include 1/4, 1/4, Range, Township, Section and distances from Section lines. Mark the appropriate boxes for North or South and East or West directions.
3. Describe the use(s) to which the water has actually been applied.
4. Enter the date of first beneficial use by the original owner. This date must be prior to May 8, 1972.
5. Enter the total depth of the well.
6. Enter the pumping rate of the well in gallons per minute.
7. The annual amount of water diverted in acre feet must be indicated. One acre foot is equivalent to 325,900 gallons. A typical home with lawn and garden irrigation diverts an average of one acre foot. Average home use that does not include lawn and garden irrigation (watering) diverts 1/3 acre foot.
8. Report the area irrigated either as one acre, fraction of one acre or square feet by filling in the correct number and check the appropriate box. You must describe the specific area irrigated using either the legal description of that land or by referencing the Subdivision, Lot, Block and Filing or Unit number. The watering of home gardens and lawns is considered irrigation and must be reported. If the well is not used for irrigation, place a zero in the acres irrigated blank. One acre is equivalent to 43,560 square feet.
9. The well owner must sign the form. Print or type your name in the first block if it is different from Item No. 1. If signing as a representative of a company who owns the well, then your title must also be included in the first block. Sign the second block and date the last block.

The existence and use of the well must be verified by field inspection before the registration can be evaluated. For an inspection, contact the Division Office where your well is located.

If a field inspection cannot confirm a claimed historic use, you may have to provide other evidence or affidavits to support such claim.

Water Divisions and offices are based on the major river drainage areas. For example, the Division One office administers the South Platte River Basin.

WELL ABANDONMENT REPORT

ABANDONED WELL NUMBER IF REGISTERED 4409

1. INDIVIDUAL/COMPANY RESPONSIBLE FOR PLUGGING

NAME(S) GEORGE LEFEVER
Mailing Address P.O. Box 2182
City, St. Zip LONGMONT, CO 80502
Phone (303) 678-1944

2. ACTUAL WELL LOCATION: COUNTY BOULDER

PROPERTY ADDRESS AIRPORT ROAD, LONGMONT CO 80501
(Address) (City) (State) (Zip)

NW 1/4 NW 1/4, Sec. 12 Twp. 2 ☒ N. ☐ S., Range 69 ☐ E. ☒ W. 6 P.M.

Distances from Section Lines _____ Ft. from ☐ N. ☐ S. Line, _____ Ft. from ☐ E. or ☐ W. Line.

3. I (we), report that an existing well was plugged and abandoned for the following reason(s):

- ☐ The well was plugged and abandoned as required under the conditions of approval of Well Permit No. _____
- ☒ The well was not in use and was abandoned.
- ☐ Other (please explain) _____

4. The well was plugged and abandoned according to the Water Well Construction and Pump Installation Rules on Sept, 1965

5. The well was plugged with the following materials placed at the indicated intervals:

AMOUNT AND TYPE OF MATERIAL	METHOD OF PLACEMENT	INTERVAL
_____	_____	from _____ feet to _____ feet
_____	_____	from _____ feet to _____ feet
_____	_____	from _____ feet to _____ feet
_____	_____	from _____ feet to _____ feet
INTERVALS OF CASING REMOVED/RIPPED IN FEET		from _____ feet to _____ feet
		from _____ feet to _____ feet

6. I (we) have read the statements made herein and know the contents thereof, and that they are true to my (our) knowledge. [Pursuant to Section 24-4-104 (13)(a) C.R.S., the making of false statements herein constitutes perjury in the second degree and is punishable as a class 1 misdemeanor.]

The report must be typed or printed in **BLACK INK**. All changes on the form must be initialed and dated. Attach additional sheets if more space is required. Each additional sheet must be identified at the top by the well owner's name, the permit number, form name/number and a sequential page number. Report depths in feet below ground surface.

This form may be reproduced by photocopy methods, or by computer generation with prior approval by the State Engineer. Photocopy reproductions must retain margins and print quality of the original form.

The original form must be submitted to the State Engineer's Office within 60 days after completing the well or 7 days after the permit expiration date, whichever is earlier.

A copy of the form must be provided to the well owner.

1. Complete the **Well Permit Number** in full.
2. Fill in Name and Mailing Address of Well Owner where correspondence should be sent.
3. Complete the blocks for the **actual** location of the well where drilled. If the owner has more than one well serving this property, provide the identification (**Owner's Designation**) for this well. **DO NOT USE THE OWNER SUPPLIED LOCATION** unless a survey has been provided. For wells located in subdivisions the lot, block and subdivision information must also be provided.
4. Report the ground surface elevation in feet above sea level if available. This value may be obtained from a topographic map. Describe the drilling method used to construct the well and the date completed. Indicate the total depth drilled and the actual completed depth of the well.
5. Fully describe the materials encountered in drilling. Do not use formation names unless they are in conjunction with a description of materials.
Examples of descriptive terms include:
Grain size--Boulders, gravel, sand, silt, clay.
Hardness--Loose, soft, tight, hard, very hard.
Color--All materials. Most critical in sedimentary rock.
Depth when water is encountered (if it can be determined).
6. Provide the diameters of the drilled bore hole.
7. The outside diameter, kind, wall thickness and interval of casing lengths must be indicated.
8. Indicate the type and size of filter (gravel) pack and the interval where placed.
9. Indicate the type and setting depth for any packers installed.
10. The density of the grout slurry must be reported and may be indicated as pounds per gallon, gallons of water per sack, total gallons of water and number of sacks used, etc. Specify the grout placement method, i.e. tremie pipe or positive displacement. The percentage of additives mixed with the grout should be reported under remarks.
11. Record the type and the amount of disinfection used, how placed and the length of time left in the hole.
12. Report well test data as required by Rule 10.7. Spaces are provided to report all measurements made during the test. The report should show that the test complied with the provisions of the rules. If a test was not performed explain when it will be done. If available, report clock time when measurements were taken.
13. Fill in **Company Name and Address of Contractor** who constructed the well. The report must be signed by the licensed contractor responsible for the construction of the well.

PERMIT TO CONSTRUCT A WELL

ISSUANCE OF THIS PERMIT DOES NOT CONFER A WATER RIGHT

CONDITIONS OF APPROVAL

- 1) This well shall be used in such a way as to cause no material injury to existing water rights. The issuance of this permit does not assure the applicant that no injury will occur to another vested water right or preclude another owner of a vested water right from seeking relief in a civil court action.
- 2) The construction of this well shall be in compliance with the Water Well Construction Rules 2 CCR 402-2, unless approval of a variance has been granted by the State Board of Examiners of Water Well Construction and Pump Installation Contractors in accordance with Rule 18.
- 3) Approved pursuant to CRS 37-92-602(3)(c) for the relocation of an existing well, permit no. 220950. The old well must be plugged in accordance with Rule 15 of the Water Well Construction Rules within ninety (90) days of completion of the new well. The enclosed Well Abandonment Report form must be completed and submitted to affirm that the old well was plugged.
- 4) The use of ground water from this well is limited to the irrigation of not more than 0.75 acres of home gardens and lawns.
- 5) The maximum pumping rate of this well shall not exceed 15 GPM.
- 6) This well shall be constructed not more than 200 feet from the location specified on this permit.

RESIDENTIAL APPLICATIONS - GENERAL INSTRUCTIONS

There are a variety of uses for ground water in Colorado. This form (GWS-44) can be used when applying for a permit for a new well or replacement of an existing well for the following types of uses:

ORDINARY HOUSEHOLD USE inside one single family residence (NO outside water use allowed)

OTHER RESIDENTIAL USE (sometimes referred to as "domestic" use) which may include use in up to three single-family residences, watering of up to one acre of home gardens and lawns, and watering of domestic animals

LIVESTOCK WATERING on a farm, ranch, range, or pasture

If you are applying for a NEW household use only well, or for a NEW 35 + acre residential well outside the Denver Basin or Designated Basins of eastern Colorado, please use simplified forms GWS-49 or GWS-50. DO NOT use this form for registration of an existing unpermitted well (Use Form GWS-12), monitoring/observation wells (Use Form GWS-46), gravel pit wells (Use Form GWS-27), or for other uses not listed above, including - commercial, industrial, crop irrigation, municipal, etcetera (Use GENERAL PURPOSE Form GWS-45).

FEES Applications must be submitted with the appropriate required non-refundable filing fees. The required filing fee for most well permit applications is \$60. The filing fees for replacement or deepening well permit applications for most previously permitted residential and livestock water wells is \$20.

Checks should be payable to the COLORADO DIVISION OF WATER RESOURCES.

Applications are evaluated in chronological order. Please allow approximately six weeks for processing.

APPLICATIONS must be completed clearly, and legibly, in BLACK INK or typed. ALL ITEMS in the application must be completed. Incomplete applications may be returned to the applicant for more information. Do not change or alter the application in any way.

THE LOCATION of the well in item 4 must be correctly and accurately described. The county, quarter/quarter, section, township, range, principal meridian, and distance from section lines must be provided.

NOTE: Distances are not necessarily the same distances as the distances from (your) property lines.

For additional assistance in describing the location of your well, review the publication entitled "How to Determine Well Location" which was provided with your packet, or can be requested from any Colorado Division of Water Resource office.

A LEGAL DESCRIPTION of your lot or parcel of land is required in item 5. For tracts of less than 35-acres approval may depend upon whether the tract was created by a division of land after June 1, 1972. If your lot is less than 35 acres in size, it would be prudent to have a deed or legal description that shows your tract was divided from a larger tract prior to June 1, 1972. This may be accomplished by obtaining a copy of a deed for the tract issued prior to June 1, 1972.

An ORIGINAL signature must be on each application. The applicant's authorized agent may sign the application, if a letter signed by the applicant is submitted with the application authorizing them to act as agent for the purpose of obtaining a well permit.

IF YOU HAVE ANY QUESTIONS regarding any item on the application form, please call the Division of Water Resources Ground Water Information Desk (303-866-3587), or the nearest Division of Water Resources Field Office located in Greeley (970-352-8712), Pueblo (719-542-3368), Alamosa (719-589-6683), Montrose (970-249-6622), Glenwood Springs (970-945-5665), Steamboat Springs (970-879-0272), or Durango (970-247-1845).

APPENDIX G

Vapor Encroachment Screening

Phase I Environmental Site Assessment (ESA) Vapor Encroachment Conditions (VEC) matrix includes a (1) Search Radius Test, (2) Chemicals of Concern (COC) Test, and (3) a Critical Distance Test [1].

(1) Search Radius Test: Are there known or suspect contaminated properties in the primary area of concern within the corresponding search radii?

☐ **Yes** ☒ **No** If **No**, then screening for a VEC is complete and no VEC currently exists, go to #4. If **Yes**, then:

(2) Chemicals of Concern Test: Are COCs likely to be present within the area of concern for those known or suspect contaminated sites identified based on the Search Distance Test?

☐ **Yes** ☐ **No** If **No**, then screening for a VEC is complete and no VEC currently exists, go to #4. If **Yes**, then:

(3) Critical Distance Test: A plume test to determine whether or not COCs in the contaminated plume(s) may be within the critical distance.

☐ **Yes** ☐ **No** (3a) Is information related to the contaminated plume(s) available (i.e. isoconcentration maps, site drawings, etc.)?

(3b) If **No**, then a VEC cannot be ruled out; check **Yes** in #4 below indicating it is likely a VEC exists. If **Yes**, then:

☐ **Yes** ☐ **No** (3c) Is the site less than 100 feet to the nearest edge of a contaminated [non-petroleum hydrocarbon] plume(s)? If **Yes**, then check **Yes** in #4 below indicating it is likely a VEC exists.

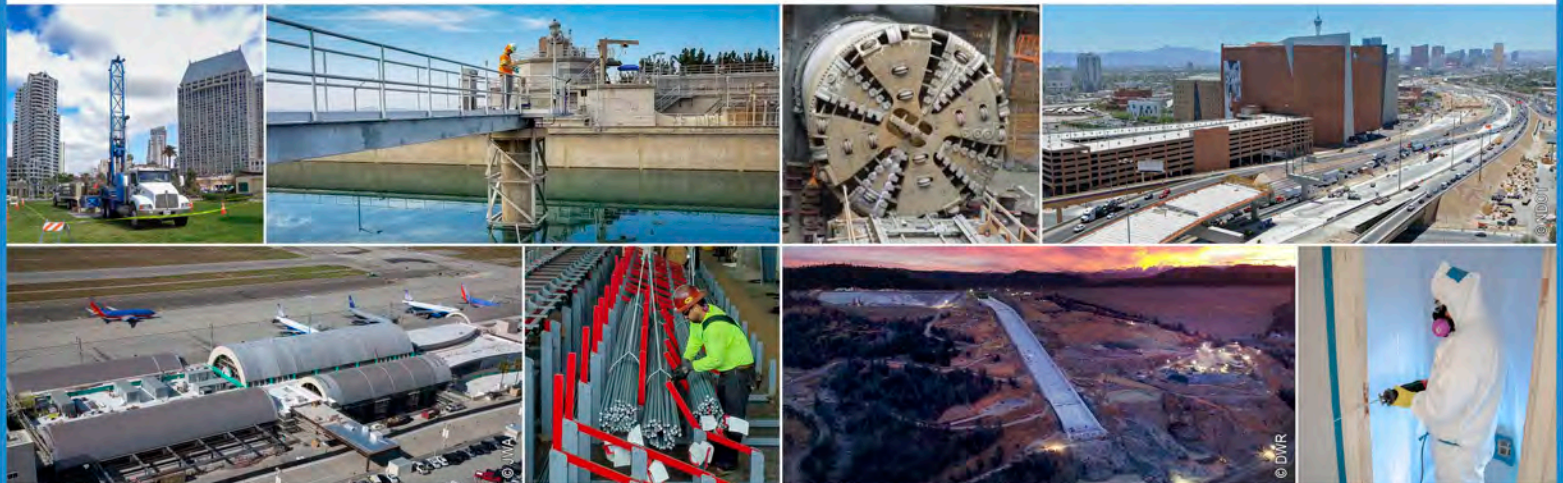

☐ **Yes** ☐ **No** (3d) Is the site less than 30 feet to the nearest edge of a dissolved petroleum hydrocarbon plume(s)? If **Yes**, then check **Yes** in #4 below indicating it is likely a VEC exists.

If the distance from the nearest edge of a contaminated plume to the nearest existing or planned structure on the site is less than 100 feet for non-petroleum hydrocarbon COC, or less than 30 feet for dissolved petroleum hydrocarbons, then it is presumed that a VEC currently exists beneath the site. If the distance from the nearest edge of the contaminated plume is greater than or equal to 100 feet for non-petroleum hydrocarbons, or 30 feet for dissolved petroleum hydrocarbon chemicals of concern, then it is presumed unlikely that a VEC currently exists beneath the site.

(4) Is it likely that a VEC currently exists beneath the site?

☐ **Yes** ☒ **No** If **No**, then the VEC screening is complete and no further investigation is recommended at this time. If **Yes**, Ninyo & Moore recommends performing additional assessment, such as a Tier 2 VEC assessment according to ASTM E 2600-10.

[1] Based on guidance presented in the ASTM E 2600-10 Standard.
