---

Phil,

Given its location and the surrounding residential we have no comments on the annexation and concept plan. We would encourage the City to have disclosure statements so they are aware that there is an airport in the vicinity.

I apologize for the delay, please let me know if you need anything else.

Thanks,

John Sweeney

**Re: 8902 Quail Road**

Public Service Company of Colorado's (PSCo) Right of Way & Permits Referral Desk has reviewed the plans for **8902 Quail Road Annexation and Zoning**. Please be advised that Public Service Company has existing overhead electric distribution facilities within the areas indicated in this proposed rezone. Public Service Company has no objection to this proposed rezone, contingent upon Public Service Company of Colorado's ability to maintain all existing rights and this amendment should not hinder our ability for future expansion, including all present and any future accommodations for natural gas transmission and electric transmission related facilities.

The City of Longmont must send us notification after approval of the proposed annexation has been finalized. This notification should be sent to Ms. Iffie Jennings at [Iffie.M.Jennings@xcelenergy.com](mailto:Iffie.M.Jennings@xcelenergy.com). This will allow our mapping department to make the necessary updates to our mapping system.

The property owner/developer/contractor must complete the application process for any new natural gas service, or modification to existing facilities via [xcelenergy.com/InstallAndConnect](https://xcelenergy.com/InstallAndConnect). It is then the responsibility of the developer to contact the Designer assigned to the project for approval of design details.

For additional easements that may need to be acquired by separate PSCo document, the Designer must contact a Right-of-Way Agent.

As a safety precaution, PSCo would like to remind the developer to contact Colorado 811 for utility locates prior to construction.

Mr. Taylor,

The answer I received is that you need to submit a 4760 obstruction evaluation request to our OE POC, Evan Jagielo.

Please contact him to begin that process at [Evan.Jagielo@faa.gov](mailto:Evan.Jagielo@faa.gov). His number is 206-231-2540.

Who is doing our obstruction evaluations?

Can you have them verify if a 7460 is required for 8902 Quail Road in Longmont Colorado. Appears to be far enough from Longmont airport.

The annexation plan is for residential building.

Thank you very much,

**Phil Taylor, AICP**

**TO:** Phil Taylor, AICP  
**FROM:** Ethan Abner, Long Range Planning Division, Boulder County  
**RE:** Referral for Project File #DV-ANNEX-24-00007  
**DATE:** June 26, 2027

---

The Boulder County Long Range Team has reviewed the provided referral materials for DV-ANNEX-24-00007.

1. The applicant is proposing to annex four parcels of approximately 17.34 acres and zone the property to Residential Mixed Neighborhood to develop a mixed residential project within the Longmont Planning Area. Planned are two-and three-story residential units with up to 18 density units/acre, or approximately 310 dwelling units over the entire parcel.
2. The property is within the Longmont Annexation Boundary and is part of the Potential Annexation Area (PAA) as defined in the Longmont Planning Area Comprehensive Development Plan Intergovernmental Agreement (the IGA). Areas within the PAA are anticipated to be annexed into the City of Longmont. This annexation is consistent with the IGA.
3. The subject property is part of an enclave of Boulder County and surrounded by incorporated areas of the City of Longmont to the northeast, east, and south.
4. In the late 1990s the County closed Quail Road off Airport Road because of significant cut-through from Airport Road to Nelson Road through the Schlager subdivision because the roads in the subdivision are not adequate to handle urban levels of vehicle traffic. An Emergency Vehicle Access (EVA) is planned along the Quail Road right-of-way to the north while primary access to the proposed development is planned through two entrances off Clover Basin Drive on the southern border of the project.
  - a. The County opposes any single-occupancy-vehicle access north to Quail Road and appreciates that the developer recognizes the limitations of the infrastructure to the north and in the concept plan provided.
  - b. Staff support the conceptual multimodal connection for bicyclists and pedestrians running south to north on the east side of the parcel. The Transportation Planning Division also notes the following:
    - i. As outlined in the Envision Longmont (2016) plan, there are considerations to support active transportation and provide safe connections to the multimodal transportation system, as follows.
    - ii. For on-site facilities and future programs:
      - 1) Pedestrian, bicycle, and vehicular internal circulation that promotes a safe and comfortable environment for all

travel modes with street design features such as curb extension and daylighted intersections.

- 2) Secure, if possible covered, bicycle parking with electrical outlets to charge e-bikes.
  - 3) Charging stations for electric vehicles.
  - 4) Neighborhood Eco-Pass (i.e., transit access) program for residents.
- iii. For off-site facilities and future programs:
- 1) Multi-use path in east-west orientation detached from Clover Basin Drive.
  - 2) Raised crossings and appropriate curb radius at two access points where driveways cross multi-use paths.
  - 3) Bus stop amenities such as shelter, benches, lighting, and bike racks.
  - 4) Future bike share station space co-located at north side bus stop.
  - 5) Enhanced crosswalk features at Larkspur Drive.
- c. County staff request that the annexation agreement make clear that there will not be vehicular access north to Quail Road with the exception for an EVA with knock-down feature.
- d. Since the nature of the EVA is not well defined at this stage, staff also request that the County Engineer be provided an opportunity to review and approve the final construction documents for any access point on Quail Road and that this requirement also be included in the annexation agreement.

5. Staff appreciate the City of Longmont's participation in the goals outlined by the Regional Housing Strategy, *Expanding Access to Diverse Housing for our Community*, which focus on meeting the challenges providing affordable housing in the region. Staff look forward to seeing how goals related to affordable and attainable housing will be implemented as part of this project.

We look forward to continuing to provide feedback and input throughout this process.

Sincerely,

Ethan Abner  
Long Range Planner

Hello Phil,

After reviewing the Marshall Mesa Trailhead project, we have determined that take is not reasonably certain to occur for the Preble's Meadow Jumping Mouse (Preble's). Our conclusion is based on the project area and site description. The project area is not within any critical habitat of Preble's. The area is in a highly development community and has little with no dense vegetation near a wetland or a wet meadow. Therefore, there are no physical or biological features needed for Preble's habitat.

We appreciate your request for assistance and encourage you to contact us again if any other assistance is needed.
