LYNGSOE LIBRARY LOCKER

EXTEND THE REACH OF YOUR LIBRARY AND OFFER 24/7 PICK-UP-HOLDS SERVICE ANYWHERE IN THE COMMUNITY

PICK UP HOLDS ANYWHERE, ANY TIME
Materials, reserved via the library website, can be collected from the Lyngsoe Library Locker at the convenience of your patrons - 24 hours a day. Patrons can retrieve their items in a single step - by simply presenting their library card to the locker. The Lyngsoe Library Locker can be placed inside or outside normal library facilities, or remote locations around your service area, like the community center, bus and train station or the mall, extending the library's service reach and enhancing convenience for the patrons.

SCALABLE TO MEET YOUR NEEDS
With the Lyngsoe Library Locker you can start small and grow big over time. Depending on your capacity needs, the locker system can be expanded by supplementing the main kiosk module with add-on modules. Furthermore, the Lyngsoe Library Locker is on-site configurable, allowing you to adjust existing compartment sizes by simply swapping out different door sizes and removing or adding shelves, to meet your changing demands.

FULL ILS INTEGRATION FOR EFFICIENT STAFF WORKFLOW
The cloud-based Library Locker application is fully integrated to your ILS, providing the fastest and easiest process for your staff to maintain and load new items for patron retrieval. Loading the Locker requires no back of house tasks, items simply need to be presented to the barcode scanner for check-in to the locker. Via SIP2 to the LMS, the patrons are notified that the materials are ready for pick-up.

EASY AND INTUITIVE INTERACTION FOR PATRONS
Patrons get a notification when their holds are ready for pickup. The only thing the patrons need to do is to scan their library card or manually enter their patron identification on the user-friendly kiosk touch screen. There identification is verified, and the relevant door(s) opens while the materials are automatically being checked-out in the LMS.

BENEFITS
- Holds-pick-up anytime, anywhere
- Cloud-based management software
- Dashboard with live data
- Meets outdoor environment demands
- Patent-pending site configurable locker process

SPECIFICATIONS   LYNGSOE LIBRARY LOCKER
