

LYNGSOE LIBCABINET™

ACCESS TO BOOKS 24/7

With the Lyngsoe LibCabinet™, you can offer an independent mini library at an indoor location of your choice; the patrons can have access to your books 24/7. With a combined check-in, check-out and holds function, all you need is a network cable and power outlet. The LibCabinet allows you to maintain or even significantly extend the library's reach.

FAST AND EASY RETURN OF BOOKS

The stylish, transparent doors are equipped with an electronic lock that can easily be opened by presenting a patron card to a card reader. The patron takes the books he or she wants and just closes the door again. After closing the door, the LibCabinet prints out a receipt, which tells the patron exactly which books he or she has taken and when they need to be returned. Returning a book is equally simple: present the card - open the door - return the book.

INTUITIVE USER EXPERIENCE

The intuitive user interface gives the patrons all the information they need. An integrated thermal printer provides the patron a receipt of all transactions that have taken place, so they can always check what they have returned or checked out of the library.

FULL INVENTORY OVERVIEW

The LibCabinet communicates over the industry protocol SIP; all lending traffic is fed back to your library management system.

The LibCabinet software has a full feature maintenance mode. While in maintenance mode you can perform a full inventory and print out the inventory result. LibCabinet can be connected to our Centralized Management software, which provides reporting and remote control functionalities.

BENEFITS

- Can be placed in any location
- Easy and fast check-out, check-in and holds
- Smart phone identification
- No staff needed
- Very large capacity 200+ items
- Very fast read < 5 sec.
