

CITY OF LONGMONT | Department of Public Safety
Police, Fire, and Community Health & Resilience

POLICE INFORMATION 303-651-8555 | **FIRE INFORMATION** 303-651-8437
COMMUNITY HEALTH AND RESILIENCE OFFICE 303-651-8438
9-1-1 EMERGENCY COMMUNICATIONS CENTER 303-651-8501

The Longmont Police Department (LPD) is respectfully requesting grant funding from the Coronavirus Emergency Supplement Funding (CESF) for Personal Protective Equipment (PPE) to protect our police officers in their response to the public safety needs of the Longmont community.

Boulder County has an overall population of 326,196, including several municipalities. Our primary jurisdiction service population is 97,500, and we provide mutual aid support to every law enforcement and fire service agency in the county.

We are requesting \$86,258.00 to purchase the following:

- Two (2) Virtual Private Network (VPN) laptops that will enable our Longmont Emergency Communications Center (LECC) management to log in remotely and update Computer Aided Dispatch (CAD) and dispatch 911 calls from anywhere WIFI is present
- Medical bags for patrol cars for everyday use with the appropriate PPE and supplies to care for our officers and residents
- Protective coveralls that have a higher level of protection for our officers due to the fluid resistant barrier during a questionable call or death investigation
- Laser safety glasses to protect our officers eyes as laser strikes are more prevalent in large crowds or civil disturbances
- Tactical medical (TACMED) response kits for suspicious events or active shooter situations that includes a "throw kit" that can be thrown to the injured who can potentially stop their own bleeding and the first responder would have a reduced risk of exposure and can continue to deal with the threat in a more efficient manner

As we continue to see increasing resistance to safer-at-home orders, growing levels of protest, and increasing potential for unrest, we need to protect our officers and the community with new and expanded materials and technologies. Acquiring these items during this time of change will provide the protection needed for our officers and a better service for our citizens.

We appreciate your consideration for our request. Please do not hesitate to contact us if you have any questions or need any additional information to support our request.
